The Library has added **BookBrowse** to the list of websites and databases we subscribe to to help you, our patrons, find the information you need. We currently subscribe to BookPage magazine to give you incites on the newest books published, or soon to be published, within the current month or the next.

BookBrowse has been reviewing books for over 20 years so that readers can get help choosing a great book from more than just the current hits. BookBrowse is an excellent "Next Read" site for you or your book club. It has book summaries, excerpts and reviews like many other sites, but it goes further. It lets you search by genre, time period, setting, themes, and even book length. They have a 250 pages or less category! They give read-a-like recommendations like many other sites do, but their read-a-likes are more specific – did you like the theme, the pace of the book, the characters, the setting, etc. BookBrowse links directly to our catalog so you can put a book on hold for our library for all of Cardinal if we don’t have it.

Try it today at www.bookbrowse.com/fpl I hope you will enjoy the many benefits BookBrowse has. Let me know if you use it and what you think!
